

Chuck Feil

Photographer

Adventurer, Aviator and Author, Chuck Feil has always believed that if you follow your passions the rest will fall into place.

He has traveled five continents with his camera on his shoulder and a sense of adventure in his soul. Jane Goodall sought him out to make wildlife films on the Serengeti Plains of East Africa. Major publications and corporations appreciated his easy-going ways and ability to bring to the table dazzling photography. Being restless and never completely satisfied, Chuck “kicked it up a notch” by learning to fly and integrate it with his photography skills. Chuck is the first gyroplane pilot to fly all 48 states without ground support! His Spirit of American Youth Tour in 2000 documented these one-of-a-kind adventures. www.say2000.org.

Chuck's publishing company VFA Publishing has created 11 coffee table books of aerial images from Maine to California and a few places in between. He has exhibited in numerous galleries and museums.

Pan Terra gallery is his vision of sharing the artistic talents of those who he has come to know and respect. His works on display are images he has selected from both his aerial and ground base photography. They are all made from a 35mm format camera using both film and digital media and printed as *Giclees*.
